A step towards 3D era

Culturecom (343), the largest local comic publisher, launched the first social gaming platform Ucan.com for all comic lovers. This platform offers comic fans a chance to create their own animation or comics with full software support.

As at the first three months of 2011, Culturecom recorded a 3.55% increase in its revenue to approximately HKD 45 million, whilst profits dropped by 23% to HKD 9 million. Its earlier memorandum of understanding with Zhuhai Heng Qin Province paved the way for the setup of animation production and post-production base, which is believed to bring the animation industry to the next level.
